INDEX TO VOLUME I

Addition products of dyes, possible explanation of stain action 98
Air distributor for use in the drop method of dehydration 70
Alizarin Red S., staining cleared specimens of skeleton with 123
Anilin dyes, Inhibitory properties of 27
Ashenfelter, Mabel; Victor Burke and. Notes on the Gram stain II 63
Azure A and azure C, preparation of 17
Azure C, as tissue stain 22, 25, 68
Azure C tissue stain 79
Azure stains 107

Bacteria stained in soil 87, 125
Bacterial spores stained with carbol fuchsin 105
Basic dyes, the preparation of solutions of 143
  reactions with acids 98
Biological stains, the labeling of 96
  standardization of 11, 49, 113
Brilliant green bile media 129
Burke, Victor and Ashenfelter, Mabel. Notes on the Gram stain II 63

Candle scarlet (Geigy), as a fat stain 79
Carbol fuchsin, bacterial spores stained with 105
Carmine, picro-indigo, vetrebrate embryos stained with 37
Cesares-Gil flagella stain, modified 143
Chemical nature of metachromasy 116
Chemical structure as affecting the staining and therapeutic properties of dyes 74
Churchman, John W. Inhibitory properties of anilin dyes 27
Colon organism, detection with brilliant green media 129
Commission on Standardization of Biological Stains
  Constitution of 4
  History of 1
  Present members of 9
Conn, H. J. History of the Commission on Standardization of Biological Stains. 1
  Improved stain for bacteria in soil 125
  Progress in the standardization of stains:
    Grades of gentian violet 53
    Methods of standardization 49
    Recent information concerning basic fuchsin 55
    Standardization of eosin and related dyes 81
      of staining solutions 51
    Standardizing staining technic 113
Conn, H. J. and Holmes, Walter C. Fluorescein dyes as bacterial stains; with special reference to their use for soil preparations 87
Consideration of French's test of basic fuchsin for Endo's medium 135
Constitution of Commission on Standardization of Biological Stains 4
Crystal violet, chemical structure of 75, 76
  and erythrosin in plant anatomy 33

Dawson, Alden B. A note on the staining of the skeleton of cleared specimens with Alizarin Red S 123
  The labeling of biological stains 96

Dehydration, air distributor for 71
Drop method of dehydration, air distributor for 70
Dunham, H. G. and Schoenlein, H. A. Brilliant green bile media 129
Dyes, anilin, inhibitory properties of 27
as bacterial stains 87, 125
factors influencing their properties 74

Endo medium, the 41, 49, 135
Eosin and related dyes, The standardization of 81
B, bacterial stain 91, 93
Y, bacterial stain 91
Y with azure C and orange III as tissue stain 17, 25, 68, 79
Erythrosin and crystal violet in plant anatomy 33
B, bacterial stain 92, 94
standardization of 83, 125, 128
Y, bacterial stain 92, 93, 94

Fat stains 79
Flagella, bacterial, staining of 60
stain (Cesares-Gil) modified 143
Fluorescein, chemical formula of 88
dyes as bacterial stains 87, 125
dyes as bacterial stains: with special reference to their use for soil preparations 87
French azure C tissue stain 25, 79
azure C tissue stain, modified 68
French, R. W. Azure C tissue stain 79
Chemical structure as affecting the staining and therapeutic properties of dyes 74
Fat stains 79
Standardization of biological stains as a problem of the Medical Department of the Army 11
French's test for the Endo medium 49, 135
French, R. W.; W. A. Holmes and. The oxidation products of methylene blue .. 17
Frozen sections, preparation of 39
Fuchsins, variations in 41, 49
Fuchsin, acid, inhibitory properties of 29, 30
basic, bacterial spores stained with 105
for Endo's medium 41, 135
staining bacterial flagella with 60, 143
standardization of 49
vertebrate embryos stained with 37
and picro-indigo-carmine, a polychromatic stain for vertebrate organogeny. 37

Gentian violet 52, 63
inhibitory properties of 28, 29
Genung, Elizabeth F. A consideration of French's test of basic fuchsin for Endo's medium 135
Basic fuchsin as an indicator in Endo's medium 41
Gram stain, Notes on 63

Haematoxylin, Delafield's, for frozen sections 40
in Weigert-Pal technic for staining myelin 72
Hance, Robert T. An air distributor for use in the drop method of dehydration. 71

Haynes, Rachel. Azure stains 107
Modification of the French azure C tissue stain 68
History of the Commission on Standardization of Biological Stains 1
Hogue, M. J. Staining protozoa with Janus green B 35
Holmes, Walter C.; H. J. Conn and. Fluorescein dyes as bacterial stains: with special reference to their use for soil preparations 87
Holmes, W. C. and R. W. French. The oxidation products of methylene blue .. 17
Holmes, Walter C. The chemical nature of metachromasy 116
The mechanism of stain action with basic dyes 98
The preparation of solutions of basic dyes 143

Improved stain for bacteria in soil 125
Indigo carmine, with fuchsin in staining vertebrate embryos 37
Inhibitory properties of anilin dyes 27
Iron-haematoxylin method for fecal smears 78

Janus green B, a stain for protozoa 35
Jackson, Gemma. Crystal violet and erythrosin in plant anatomy 33

Kornhauser, S. I. A quick iron-haematoxylin method 78
Kulp, Walter L. A method for the staining of bacterial flagella 60
Labeling of biological stains, The 96
Lippincott, L. S. A technic for preparing frozen sections 39

May, Henry G. A safe spore stain for class use 105
Mechanism of stain action with basic dyes 98
Media containing brilliant green and bile 129
Members of the Commission on Standardization of Biological Stains 9
Metachromasy, The chemical nature of 116
Method for the staining of bacterial flagella 60
Methyl violet, chemical structure of 75, 76
Methylene azure 17, 68, 79, 107
blue, stain for spores of bacteria 105
The oxidation products of 17
Miller, J. W. The Weigert-Pal technic for staining myelin 72
Modification of the Cesares-Gil flagella stain 143
Modification of the French azure C tissue stain 68
Myelin, stained by technic of Weigert-Pal 72

Notes on the Gram stain II 63
Note on the staining of the skeleton of cleared specimens with Alizarin Red S ... 123

Oil red O (National Aniline), as a fat stain 79
Orange II, with azure C and eosin as a tissue stain 17, 25, 68, 79
Oxidation products of methylene blue, The 17

Phloxine, bacterial stain 92
standardization of 83, 128
B, bacterial stain 92, 93, 94
Plant cell wall stains, crystal violet and erythrosin 33
Polychromatic stain for vertebrate organogeny 37
Preparation of azure A and azure C 17
Preparation of solutions of basic dyes, The 143
Progress in the standardization of stains:
Grades of gentian violet 53

Methods of standardization 49
Recent information concerning basic fuchsin 55
Standardization of eosin and related dyes 81
of staining solutions 51
Standardizing staining technic 113
Properties of dyes, staining and therapeutic 74
Protozoa, Janus green B as a stain for 35

Quick iron-haematoxylin method 78

Rose bengal, bacterial stain 92, 94, 125, 128

Safe spore stain for class use 105
Schoenlein, H. A.; H. G. Dunham and. Brilliant green bile media 129
Sections, frozen, preparation of 39
Shumway, Waldo. Fuchsin and picro-indigo-carmine, a polychromatic stain for vertebrate organogeny 37
Skeleton, stained cleared specimens with Alizarin Red S 123
Solutions of basic dyes, The preparation of 143
Stains for fat 79
for plant cell walls (crystal violet, erythrosin) 33
Staining bacteria in soil 87, 125
bacterial flagella with fuchsin 60
bacterial spores with carbol fuchsin 105
myelin, by Weigert-Pal method 72
nuclei with methylene azure 107
Protozoa with Janus green B 35
standardizing technic of 113
with azure C 79
with Alizarin Red S 123
fecal smears with iron-haematoxylin 78
vertebrate embryos with fuchsin and picro-indigo-carmine 37
Standardization of stains 11, 49, 113
of eosin and related dyes 81
of biological stains as a problem of the medical department of the army 11
Standardizing staining technic 113
Sudan III, fat stain 79

Technic for preparing frozen sections 39
Thatcher, Lida M. A modification of the Cesares-Gil flagella stain 143
Tissue stain (azure C, eosin Y and orange II) 25, 68, 79

Weigert-Pal method, staining myelin 72
Weigert-Pal technic for staining myelin, The 72

Vertebrate embryos stained with fuchsin and picro-indigo-carmine 37
